

DEPARTMENT OF MANUFACTURING AND INDUSTRIAL ENGINEERING
FACULTY OF ENGINEERING
UNIVERSITY OF PERADENIYA

POSTGRADUATE PROGRAMME IN ENGINEERING MANAGEMENT

The Postgraduate Programme in Engineering Management offered by the Department of Manufacturing & Industrial Engineering (DMIE) was established through the ADB funded project in 2000. Its alumni include professional engineers and managers currently serving in leading enterprises locally and internationally as well as government and semi government organizations. This unique programme covers essential theories and principles required for Engineering Management and guides candidates to apply them to real-world industrial problems. With internationally qualified lecturers and some up-to-date syllabi, this programme becomes popular among Engineering and Managerial professionals in the Manufacturing & Service Sectors. Programme includes blended learning (in-class and online), hands on experience in software platforms, workshops/seminars and industry visits. The programme is managed via Learning Management System which facilitate 24/7 accessibility to educational resources.

Applications are now called for the 2022 intake of the Postgraduate Programme in Engineering Management leading towards the qualifications of;

- ❖ Master of the Science of Engineering (MSc.Eng.) for Engineering Graduates
- ❖ Master of Science (MSc) for Non-Engineering Graduates
- ❖ Postgraduate Diploma (PGDip.)

Admission Requirement:

A first degree in engineering of at least 120 credits (SLQF L6) with first or second class honours OR with a minimum of one year's experience after obtaining the Degree, subjected to the general regulations for the postgraduate programmes at the Faculty of Engineering, University of Peradeniya.
