

BE BRILLIANT AS A PIM MBA

Don't just have an MBA

THE PROGRAMME

PIM pioneered the Master of Business Administration (MBA) programme three decades ago, and has brought forward over three thousand business leaders. Today, it is the most sought-after MBA in Sri Lanka. PIM MBA is aimed at transforming practitioners into professional managers in a challenging, yet an enjoyable setting that enables a healthy work-life balance.

PIM MBA is constantly re-engineered based on evolving business needs and challenges, and is delivered through a best-in-class team of both academics and industry experts. Action-learning facilitated by assignments and project work helps students relate and apply the cutting-edge knowledge they gather to their world-of-work.

Within a period of two years, the programme moves logically and sequentially from courses on management foundations to integrative studies, followed by elective courses and a research project. For those who are academically bent, the thesis option is also available. The programme is structured on robust theoretical foundations and most up to-date practical applications. Its design caters very well to the busy working managers to get a rich learning experience that will transform them into outstanding leaders and achievers.

APPLICATIONS

Applications for admission to the two-year PIM MBA degree programme will be accepted up to October 31, 2021.
